European e-Justice Strategy for the future

Gösta Petri
European Commission
DG Justice and Consumers

15 November 2017

1. The e-Justice Portal

2. e-CODEX

3. Various interconnections of registers

4. Exchange information system in the context of the EIO Directive and MLA conventions

European e-Justice Portal - 1/2

- **150 topics in 23 languages**

- **+- 30.000 pages**

- **Various interconnected registers**

- **Find a lawyer/Find a notary systems**

European e-Justice Portal - 2/2

- **Electronic submission of claims**

- **Case Law search engine (ECLI)**

- **European Court Database**

- **Machine translation**

e-CODEX

- **A secure delivery platform allowing to exchange structured data**

- **Exchanges Court to Court or Citizen to Court**

- **Serves various European procedures**

Various interconnections of registers

- **Interconnection of business registers (live)**

- **Interconnection of insolvency registers (version 1 live, version 2 being prepared)**

- **Interconnection of land registers (work on-going)**

Exchange information system in the context of the EIO Directive and MLA conventions

- **Scope: exchange of evidence data, including large files over a secured infrastructure**

- **The Commission will provide a Reference Implementation Platform implementing these exchanges, a transmission solution and storage solution for the exchange of large files**

Exchange information system in the context of the EIO Directive and MLA conventions

- **System will be extendable to other legal instruments and other users (third party countries and external service providers)**

- **Target production date: Q4/2019**

Strategy and Action Plan 2019-2023

- **The current e-Justice Strategy and Action Plan 2014-2018 of the Council come to an end in 2018.**

- **Work to prepare Strategy and Action Plan 2019-2023 under way – to be finalised by the end of 2018 under AT Presidency**

Strategy and Action Plan 2019-2023

- *Three strands:*
  - **Report on the achievements of the current Action Plan 2014-2018**
  - **a Strategy setting out the main principles and objectives for EU e-Justice policy**
  - **Action Plan listing more concrete initiatives on which the e-Justice work should focus in the period 2019-2023**

Principles for the new Strategy

- **Evaluation:** the current Action Plan should be assessed in order to see how the projects have been implemented

- **Participation:** all or as many Member States as possible should participate in the e-Justice projects that are included in the next Action Plan;

- **Focus:** concentrate on a limited achievable number of topics of high added value where we can deliver

Possible topics for new Strategy

- **Digital justice – digital by default**
- **User-centricity for design and delivery of digital public services**
- **Sustainability and interoperability**
- **Electronic authentication and signatures**
- **Artificial intelligence in the judiciary**
- **Interconnection of national databases**

Thank you
